🔗 Portfolio

Profile

I am a Front-End Web Developer passionate about creating user-focused and responsive web projects. I am currently working on personal projects to strengthen my practical skills while learning BackEnd Development to build complete, full-stack solutions. I am eager to contribute to web development projects and continue growing professionally in a dynamic environment. I am also highly motivated to learn new technologies and collaborate within a team to deliver innovative and high-quality digital products.

Professional Experience

Personal and Educational Projects - Front-End Development
2022 - Present

Despite not having formal work experience yet, I have been actively learning and building web applications for over three years, focusing on creating responsive and user-friendly interfaces with modern technologies.

- Developing and improving web applications using **HTML**, **CSS**, and **JavaScript**.
- Building advanced projects with **React.js**, **Next.js**, and **TypeScript**.
- Practicing **responsive design** and applying **UI/UX principles**.
- Using **Git**, **GitHub**, and **VS Code** for version control and development workflow.
- Learning **back-end development** with **Node.js** and **Express**, and working with **databases** such as **MongoDB** and **MySQL** to build full-stack applications.

Technical Skills

- **HTML5 / CSS3 / Javascript (E6+)**
- **React.js / Next. js / TypeScript**
- **SASS**
- **Bootstrap / TailwindCSS**
- **Git & GitHub**
- **Vercel, AWS (Amplify Hosting), Cloudinary**
- **Node.js / Express.js (learning)**
- **MongoDB / MySQL / PostgreSQL (learning)**

Skills

- **Problem Solving**
- **Team Collaboration**
- **Attention to Detail**
