

Lasha Barbakadze

Front-End Developer / Junior Node.js

✉ barbaqadzelasha45@gmail.com ☎ +995 557 58 24 55  LinkedIn  GitHub  Portfolio

Skills

Languages: Georgian (Native), English (B1)

Frontend: JavaScript, TypeScript, React.js, Next.js, Zustand, Tailwind CSS

Backend: Node.js, Express.js, NestJS, REST, JWT Auth, Swagger

Databases: MySQL, PostgreSQL, MongoDB

Tools & DevOps: GitHub, Postman, Cloudinary, AWS, Unit Testing

Experience

Freelance Web Developer (2023 - Present)

Independent developer building custom web projects, working directly with clients to gather requirements, incorporate design feedback, and deliver responsive layouts across mobile and desktop. while motivated to transition into a full-time development role.

Projects

Personal Trainer Website (Freelance client project) | <https://www.gym-weightlifting.com/en>  | Next.js, TypeScript, Tailwind CSS

- Built a multi-page, multilingual website with Gym, Weightlifting, Results, Pricing, Contact and Location pages.
- Connected the contact form to a mail API so inquiries go directly to the client's inbox.
- Set up page-level SEO metadata and unique Open Graph images for every page.

Full-Stack Travel Agency Platform | <https://travel-agency-9b9s.vercel.app>  | Next.js, TypeScript, Zustand, Tailwind CSS, Vitest, Node.js, Express.js, MySQL, Stripe / Webhooks

- Implemented secure authentication with JWT access/refresh token rotation, bcrypt password hashing, OTP email verification, and Google OAuth login.
- Developed a role-based admin panel for managing tours, bookings, and users, with image uploads via Cloudinary and automatic WebP optimization.
- Integrated Stripe checkout with webhook-based payment confirmation, ensuring bookings are only marked as paid after verified payment events.
- Built the backend on a clean MVC structure with centralized error handling, Joi validation, and security middleware (Helmet, rate limiting) throughout.

Apple-Inspired Small E-Commerce Platform | <https://apple-inspiration.vercel.app>  | Next.js, TypeScript, Zustand, Tailwind CSS, Vitest, Joi, Stripe API

- Built a responsive e-commerce frontend using Next.js App Router, TypeScript, and feature-driven architecture.
- Managed global state via Zustand and used useSearchParams to sync product variants with shared URLs.
- Integrated Joi schema validation and Stripe API for a functional demo checkout flow.
- Authored unit tests with Vitest, optimized SEO metadata, and implemented Next.js error/loading boundaries.

Education

Caucasus International University
Bachelor's Degree in Information Technology

2023 – Present
Tbilisi, Georgia
